## Claydon Seed Drills Update

Claydon Seed Drills will not be supplying their crop establishment systems to Russia and Belarus while they are in conflict with Ukraine. This decision has been taken to show support to our colleagues, customers and friends in Ukraine.

We will adhere to all sanctions that our government and the EU implement on those two countries.

As farmers our company's motivation is focused on cost effective crop production, protecting the environment, and improving soil health ensuring we can supply the world with quality food using a sustainable method of crop establishment.

Our thoughts and hopes are with those that are affected by this unnecessary and pointless war and hope that the situation is ended as soon as soon possible, and we can return to feeding the world.

Establishing a better way
